ADEBAYO ANUOLUWA SUCCESS

SUMMARY

An experienced software developer with over 3 years of experience in designing and implementing software solutions. Skilled in developing responsive web applications using the React Next.js framework and mobile applications for Android and iOS platforms with React Native.

SKILLS

Soft Skills:

Strong communication and collaboration abilities with a commitment to professional ethics. Flexible and quick to learn new technologies with strong decision-making skills. Effectively addressing and resolving disagreements. Building and maintaining professional relationships.

Technical Skills:

Programming Languages: JavaScript, TypeScript, Python, Java, HTML5, CSS3, Node.js, Solidity.

Frameworks and Libraries: React.js, Next.js, React Native, Expo, Express.js, and Django.
Databases: MongoDB, MySQL, and Prisma.
Responsive Design: Proficient in creating responsive layouts using Flexbox, Grid, and media queries.
APIs: Experience with RESTful APIs and GraphQL.
Tools and Technologies: Git, GitHub, Docker, Vercel, Postman, YAML, Babel, NPM, Yarn, PNPM.
Development Practices: Data Structures and Algorithms, RESTful APIs, Jest, Mocha, React Testing Library, Jest, Unit testing, and CI/CD.
Styling: Tailwind CSS, SCSS, Bootstrap, and Material Design.
Additional Skills: Familiarity with Agile methodologies, experience with design tools (Figma), and knowledge of authentication/authorization mechanisms (OAuth, JWT).

EXPERIENCE

Petit, Budapest, Hungary — *Frontend Developer (Remote)*

AUGUST 2024 – PRESENT

- Led the design of the UI for the mobile app using React Native and the website using NextJS which enhanced skills by 70%.
- Designed 30+ pages and screens while using efficient architectural, design patterns, and maintaining 100% best coding practices.
- Worked side-by-side with 2 other React developers in developing the Petit application and website.
- Improved my proficiency in design patterns, data structures, algorithms and object-oriented design by 60%.

Agunwami Enterprise, Lagos, Nigeria — *Frontend Developer Intern (Remote)*

JANUARY 2024 – MARCH 2024

- Engaged in 90% of AGILE SCRUM meetings and submitted 95% of my daily reports.
- Employed 100% effective DRY principle of software development, adhering to separation of UI from Logic to ensure code reusability.
- Composed and effected 60% of the UI for an educational-based web application using ReactJS.
- Partnered with 3 other developers, 1 Laravel and 2 React.js developers in developing some websites for the company.

VOLUNTEER EXPERIENCE

LinkedIn Local Owerri, Owerri, Nigeria — *Volunteer*

DECEMBER 2023 – FEBRUARY 2024

- Participated in 100% of the LinkedIn Local volunteer meetings.

Hack4FUTO, Owerri, Nigeria — *Volunteer*

DECEMBER 2023 – FEBRUARY 2024

- Was present in 80% of the Hack4FUTO volunteer meetings.

OTHER EXPERIENCE

Blocksultancy, London, United Kingdom — *Community Manager (Remote)*

MARCH 2023 – OCTOBER 2023

- Oversaw the crypto Telegram groups of 3 of their clients and was present in 100% of meetings with the company and their clients.

- Reviewed the 3 whitepapers of their client's projects and articulated the goals, mission and values effectively to their communities.
- Coordinated in-house community events (giveaways, promotions, etc.) of 3 communities.

EDUCATION

Federal University of Technology Owerri, Owerri, Nigeria — *B.Tech Computer Science*

DECEMBER 2022 – DECEMBER 2026, OWERRI, NG.

Pursuing a comprehensive curriculum that combines theoretical foundations and practical applications of computer science, preparing for a career in software development.

CERTIFICATIONS

JavaScript Algorithms and Data Structures Developer Certification by freeCodeCamp.

Hack4FUTO Certificate of Participation.

LinkedIn Local Owerri Certificate of Participation.

Digital Skilling and Employment Project(DSEP) certification of completion in Web Development(Front-End).

PROJECTS

Cypheir Colour Scheme Generator

The Cypheir Colour Scheme is a crafted colour palette designed for use in projects involving colour mixing, combination and psychology (for 1-3 palettes).

One-Time Passcode Server

Time Passcode (OTP) generator that employs a time-based authentication protocol. The primary objective of this system is to enhance security measures by providing a unique, temporary passcode (from 4 – 12 characters) for authentication purposes.

Cypheir Mock API

Cypheir Mock is a tool that allows developers to create mock APIs quickly for over 100 requests.

Solidity Smart Contract

10 Solidity smart contracts built with real-life implementation.

Language Proficiency

English (UK).

Open-Source Contribution

MagicUI

Helped out in an open-source project with over 10k stars on GitHub called MagicUI, which is a React UI components library.
